

Mask AR Game

— Autism Sim —

Go about your regular activities communicating only with the Cards provided. Recommended to play in a group with up to only $\frac{1}{4}$ of players in the Card Communicator role and with a timer to help ensure all players have the chance to play (aim for 30+ min each).

★ Bonus Level: Play around people unaware of the game's existence...

★ Disclaimer: This game unfortunately can't give you Autism or really show how it feels to be Autistic, but it can be a look into how fun communication can be when we acknowledge differences in communication styles and work with them ♥
